-- SeekingAlpha.com

Many books have been written about the financial crisis and its causes, but none of them has been written by one of the key figures intimately involved in the drama. At last, one of those top insiders tells the complete story of the mortgage wars that almost destroyed the global economy.

In this no-holds-barred account, Timothy Howard exposes the perfect storm of money, power, ideology, and politics that led to the crisis. Howard was the CFO of Fannie Mae until 2004. At its peak, Fannie Mae was responsible for more than one out of every four home loans in the United States. But by the mid-2000s, what seemed to be the most successful mortgage finance system in the world completely broke down. What happened?

Howard takes you behind the scenes to show the dramatic struggles between the corporations and the politicians that led to the meltdown. In *The Mortgage Wars*, you'll learn:

- How Fannie Mae was born and evolved into the largest mortgage lender in the world
- How Fannie Mae survived the financial turmoil that killed the thrift industry
- How the subprime market grew, with very little oversight, and eventually exploded
- How political and financial jockeying sparked the mortgage wars
- What we must do to prevent a similar financial crisis from ever happening again

At long last, this inside account tells the unvarnished truth about some of the most controversial subjects of our time, including the disturbing new norm of unsafe and unsound business practices in the finance world and the huge problems that arise when politicians try to pick winners in the global markets.

The Mortgage Wars tells the real story for the first time, showing how an \$11 trillion dollar industry really fights its battles, for better or worse. Timothy Howard also shares his insights on how to keep the mortgage finance system safe, offering invaluable, prescriptive advice for all of us as we move forward into an uncertain future.
