**ALERT:** Before you purchase, check with your instructor or review your course syllabus to ensure that you **select the correct ISBN**. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, **you may need a CourseID**, provided by your instructor, to register for and use Pearson's MyLab & Mastering products.

### Packages

Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase.

### Used or rental books

If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code.

### Access codes

Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase.

--

*Forensic Fire Scene Reconstruction*, Third Edition, describes and illustrates a new systematic approach for reconstructing fire scenes, applying the principles of fire protection engineering along with those of forensic science and behavioral science.

Modern fire investigation topics are covered, including comprehensive documentation, hypothesis testing, and defensible reconstruction of the events leading up to the fire and its final results. Delving deep into forensic fire engineering, *Forensic Fire Scene Reconstruction* covers engineering calculations, fire modeling and also features several exhaustive case studies which leverage the current technology that is explained in depth throughout the text. Several specialized topic areas are also covered, including use of the drone aircraft, forensic and panoramic photography, computer modeling as well as an advanced discussion of tenability. Using historical fire cases and realistic case examples, the authors examine the newest lessons learned and insight into the ignition, growth, development, and outcome of those fires. All documentation in the case examples follows or exceeds the methodology set forth by the NFPA in NFPA 921—Guide for Fire and Explosion Investigations and its companion standard NFPA 1033—Standard for Professional Qualifications for Fire Investigator, 2009 Edition, and Kirk's Fire Investigation, Seventh Edition.
