**Pediatric and Postpartum Home Health Nursing: Assessment and Care Planning** Kathryn A. Melson RN MSN, Marie Jaffe RN MS

This compact and portable reference assists nurses in planning and implementing nursing care for pediatric clients in the home setting. Organized by body system, it includes care plans for 36 pediatric disorders most commonly treated at home. Each care plan lists nursing diagnoses, short-term and long-term expected outcomes, nursing interventions, and client and family/caregiver interventions. Since the client and/or family is an active participant in care, client teaching is emphasized throughout.
