The Cloud Essentials exam is for IT specialists, IT technical services specialists, IT relationship managers, IT architects, consultants, business and IT management, Business Process Owners, and analysts. It aims to show that the candidate has the knowledge and understanding of the main cloud computing principles and concepts. The exam code is CLO-001. It covers: Characteristics of Cloud Services From a Business Perspective Cloud Computing and Business Value Technical Perspective/Cloud Types Steps to Successful Adoption of Cloud Computing Impact and Changes of Cloud Computing on IT Service Management Risks and Consequences of Cloud Computing This Cloud exam is not a highly technical one. You don't go into the implementation details of brand specific solution. Still you need to know the basic steps to successfully adopt cloud services. You also need to know the possible risks involved and how you may deal with them. Topics that have to be dealt with in the Server+ exam include: - System Hardware - Software - Storage - IT Environment - Disaster Recovery - Troubleshooting Although you don't have to be A+ certified in order to go for Server+, knowledge covered by the A+ certification is essential. After all, we are dealing with PC-like X86 based servers here. And there is a reason why we encourage you to study Server+ and Cloud Essentials together. A cloud environment needs not to server-less. In fact, a cloud service provider has many servers for providing services. From a technical perspective one must be an expert in server computing in order to properly run a cloud service provider service center! We give you knowledge information relevant to the exam specification. To be able to succeed in the real exam, you'll need to apply your earned knowledge to the question scenarios. Many of the exam questions are written to be less straight forward. They tend to be framed within the context of short scenarios.
