## Handbook of Lapping and Polishing (Manufacturing Engineering and Materials Processing)

Lapping and polishing are currently the most precise surface finishing processes for mechanical and electronic components. Unfortunately, most improvements in either methods or understanding of the physical processes involved are closely guarded as proprietary information. The Handbook of Lapping and Polishing is the first source in English to bring to the light of day the physical fundamentals and advanced technologies at the leading edge of modern lapping and polishing practice.

Collecting decisive work contributed by industrial and academic experts from the USA, Germany, and Japan, this authoritative resource presents the latest lapping and polishing technologies along with case studies that illustrate their value. After a brief introduction, the book explains the fundamental concepts and major types of lapping and polishing processes. The discussion then turns to lapping of ductile and brittle materials followed by an in-depth look at lapping machines and equipment. Rounding out the presentation, the final chapters discuss polishing technologies and equipment as well as the latest on chemical-mechanical polishing (CMP) and its applications in the semiconductor industry.

Offering an integrated approach to both theory and practical applications under a single cover, the Handbook of Lapping and Polishing supplies a definitive survey of the most advanced surface finishing technologies available.

### **From reader reviews:**

#### **Virgina Scheffer:**

Hey guys, do you want to find a new book to see? Maybe the book with the subject Handbook of Lapping and Polishing (Manufacturing Engineering and Materials Processing) suitable to you? The particular book was written by a well-known writer in this era. The book entitled Handbook of Lapping and Polishing (Manufacturing Engineering and Materials Processing) is the one of several books that everyone reads now. This particular book was inspired a number of people in the world. When you read this publication you will enter the new dimensions that you ever knew just before. The author explained their thought in a simple way, so all of people can easily understand the core of this reserve. This book will give you a great deal of information about this world now. So that you can see the represented of the world within this book.

#### **Kathryn Robinson:**

The book with title Handbook of Lapping and Polishing (Manufacturing Engineering and Materials Processing) possesses a lot of information that you can understand it. You can get a lot of benefit after reading this book. This kind of book exists new expertise the information that exists in this guide represented the condition of the world currently. That is important to you to know how the improvement of the world. This particular book will bring you in a new era of the globalization. You can read the e-book on the smart phone, so you can read this anywhere you want.

#### **David Bruce:**

The book entitled Handbook of Lapping and Polishing (Manufacturing Engineering and Materials Processing) contains a lot of information on this. The writer explains her idea with an easy way. The language is very simple to implement all the people, so do not really worry, you can easily read that. The book was compiled by a famous author. The author will bring you in the new age of literary works. You can actually read this book because you can keep reading your smart phone, or device, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can widely open their official website in addition to order it. Have a nice examine.

#### **Michele Stoney:**

As a college student exactly feel bored to reading. If their teacher asked them to go to the library in order to make summary for some publication, they are complained. Just little students that has reading's internal or real their leisure activity. They just do what the educator want, like asked to the library. They go to there but nothing reading really. Any students feel that looking at is not important, boring and can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore, this Handbook of Lapping and Polishing (Manufacturing Engineering and Materials Processing) can make you truly feel more interested to read.
