Rehabilitation Research: Principles and Applications, 5e Russell Carter EdD PT, Jay Lubinsky PhD CCC-A/SLP

Find out how to use evidence to improve your practice! Thoroughly covering the full range of rehabilitation research with a clear, easy-to-understand approach, **Rehabilitation Research: Principles and Applications, 5th Edition** will help you analyze and apply research to practice. It examines traditional experimental designs as well as nonexperimental and emerging approaches, including qualitative research, single-subject designs, outcomes research, and survey research. Ideal for students *and* practitioners in physical therapy, occupational therapy, and communication sciences and disorders, this user-friendly resource emphasizes evidence-based practice and the development of true scientist-practitioners.

- **Evidence-Based Practice chapter** provides an overview of the important concepts of EBP and the WHO model of health and disease.
- **Interdisciplinary author team** consisting of a PT and an ASHA dually-certified SLP/AUD brings an interdisciplinary focus and a stronger emphasis on evidence-based practice.
- **Discipline-specific examples** are drawn from three major fields: physical therapy, occupational therapy, and communication sciences and disorders.
- **Coverage of nonexperimental research** includes chapters on clinical case studies and qualitative research, so you understand a wide range of research methods and when it is most appropriate to use each type.
- **Finding Research Literature chapter** includes step-by-step descriptions of literature searches within different rehabilitation professions.
- **NEW! Completely updated evidence-based content and references** makes the information useful for both students and rehab practitioners.
- **UPDATED! Expanded Single-Subject Designs chapter** provides a more thorough explanation and examples of withdrawal, multiple baselines, alternating treatments, and interactions - designs that you can use in everyday clinical practice.
