Mittag-Leffler Functions, Related Topics and Applications (Springer Monographs in Mathematics)
Rudolf Gorenflo, Anatoly A. Kilbas, Francesco Mainardi, Sergei V. Rogosin
As a result of researchers' and scientists' increasing interest in pure as well as applied mathematics in non-conventional models, particularly those using fractional calculus, Mittag-Leffler functions have recently caught the interest of the scientific community. Focusing on the theory of the Mittag-Leffler functions, the present volume offers a self-contained, comprehensive treatment, ranging from rather elementary matters to the latest research results. In addition to the theory the authors devote some sections of the work to the applications, treating various situations and processes in viscoelasticity, physics, hydrodynamics, diffusion and wave phenomena, as well as stochastics. In particular the Mittag-Leffler functions allow us to describe phenomena in processes that progress or decay too slowly to be represented by classical functions like the exponential function and its successors. The book is intended for a broad audience, comprising graduate students, university instructors and scientists in the field of pure and applied mathematics, as well as researchers in applied sciences like mathematical physics, theoretical chemistry, bio-mathematics, theory of control and several other related areas.

From reader reviews:

Robert Johnson:

This Mittag-Leffler Functions, Related Topics and Applications (Springer Monographs in Mathematics) book is simply not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is information inside this guide incredible fresh, you will get info which is getting deeper you actually read a lot of information you will get. That Mittag-Leffler Functions, Related Topics and Applications (Springer Monographs in Mathematics) without we understand teach the one who studying it become critical in thinking and analyzing. Don't be worry Mittag-Leffler Functions, Related Topics and Applications (Springer Monographs in Mathematics) can bring if you are and not make your bag space or bookshelves' grow to be full because you can have it inside your lovely laptop even cellphone. This Mittag-Leffler Functions, Related Topics and Applications (Springer Monographs in Mathematics) having fine arrangement in word and also layout, so you will not feel uninterested in reading.

Ruth Santiago:

This Mittag-Leffler Functions, Related Topics and Applications (Springer Monographs in Mathematics) is great book for you because the content that is certainly full of information for you who have always deal with world and also have to make decision every minute. This kind of book reveal it information accurately using great plan word or we can point out no rambling sentences included. So if you are read that hurriedly you can have whole info in it. Doesn't mean it only will give you straight forward sentences but challenging core information with attractive delivering sentences. Having Mittag-Leffler Functions, Related Topics and Applications (Springer Monographs in Mathematics) in your hand like finding the world in your arm, data in it is not ridiculous a single. We can say that no e-book that offer you world inside ten or fifteen second right but this guide already do that. So , this is certainly good reading book. Hello Mr. and Mrs. active do you still doubt which?

Linda Soto:

Many people spending their period by playing outside with friends, fun activity with family or just watching TV the whole day. You can have new activity to shell out your whole day by looking at a book. Ugh, do you consider reading a book really can hard because you have to bring the book everywhere? It fine you can have the e-book, getting everywhere you want in your Smartphone. Like Mittag-Leffler Functions, Related Topics and Applications (Springer Monographs in Mathematics) which is getting the e-book version. So , why not try out this book? Let's view.

Myra McKenzie:

What is your hobby? Have you heard that will question when you got scholars? We believe that that question was given by teacher to the students. Many kinds of hobby, All people has different hobby. And also you

know that little person just like reading or as reading become their hobby. You need to know that reading is very important and book as to be the thing. Book is important thing to provide you knowledge, except your current teacher or lecturer. You find good news or update with regards to something by book. Amount types of books that can you go onto be your object. One of them is actually Mittag-Leffler Functions, Related Topics and Applications (Springer Monographs in Mathematics).
