Fractional Partial Differential Equations and Their Numerical Solutions

Boling Guo, Xueke Pu, Fenghui Huang

Fractional Partial Differential Equations and Their Numerical Solutions Boling Guo, Xueke Pu, Fenghui Huang

This book aims to introduce some new trends and results on the study of the fractional differential equations, and to provide a good understanding of this field to beginners who are interested in this field, which is the authors' beautiful hope.

This book describes theoretical and numerical aspects of the fractional partial differential equations, including the authors' researches in this field, such as the fractional Nonlinear Schrödinger equations, fractional Landau Lifshitz equations and fractional Ginzburg Landau equations. It also covers enough fundamental knowledge on the fractional derivatives and fractional integrals, and enough background of the fractional PDEs.

Readership: Graduate students and researchers in mathematical physics, numerical analysis and computational mathematics.

From reader reviews:

Michael Gibson:

Often the book Fractional Partial Differential Equations and Their Numerical Solutions has a lot of knowledge on it. So when you check out this book you can get a lot of advantage. The book was written by the very famous author. Mcdougal makes some research just before write this book. This particular book very easy to read you can find the point easily after scanning this book.

Guadalupe Baxter:

Your reading sixth sense will not betray you, why because this Fractional Partial Differential Equations and Their Numerical Solutions guide written by well-known writer we are excited for well how to make book which might be understand by anyone who also read the book. Written within good manner for you, dripping every ideas and creating skill only for eliminate your personal hunger then you still question Fractional Partial Differential Equations and Their Numerical Solutions as good book not just by the cover but also by the content. This is one guide that can break don't ascertain book by its handle, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your examining sixth sense already told you so why you have to listening to a different sixth sense.

Helen Mota:

Are you kind of occupied person, only have 10 or 15 minute in your moment to upgrading your mind expertise or thinking skill possibly analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your small amount of time to read it because all this time you only find reserve that need more time to be learn. Fractional Partial Differential Equations and Their Numerical Solutions can be your answer since it can be read by you who have those short extra time problems.

Kristen Mazur:

What is your hobby? Have you heard this question when you got students? We believe that that question was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. So you know that little person just like reading or as looking at become their hobby. You need to understand that reading is very important and book as to be the issue. Book is important thing to increase you knowledge, except your teacher or lecturer. You see good news or update about something by book. Many kinds of books that can you take to be your object. One of them is niagra Fractional Partial Differential Equations and Their Numerical Solutions.
