Parallel Computing for Data Science: With Examples in R, C++ and CUDA (Chapman & Hall/CRC The R Series) Norman Matloff

Parallel Computing for Data Science: With Examples in R, C++ and CUDA is one of the first parallel computing books to concentrate exclusively on parallel data structures, algorithms, software tools, and applications in data science. It includes examples not only from the classic "n observations, p variables" matrix format but also from time series, network graph models, and numerous other structures common in data science. The examples illustrate the range of issues encountered in parallel programming.

With the main focus on computation, the book shows how to compute on three types of platforms: multicore systems, clusters, and graphics processing units (GPUs). It also discusses software packages that span more than one type of hardware and can be used from more than one type of programming language. Readers will find that the foundation established in this book will generalize well to other languages, such as Python and Julia.

From reader reviews:

Lola Paolucci:

In this 21st one hundred year, people become competitive in every way. By being competitive currently, people have do something to make these people survives, being in the middle of the particular crowded place and notice by means of surrounding. One thing that at times many people have underestimated the item for a while is reading. That's why, by reading a book your ability to survive enhance then having chance to stand up than other is high. To suit your needs who want to start reading any book, we give you this kind of Parallel Computing for Data Science: With Examples in R, C++ and CUDA (Chapman & Hall/CRC The R Series) book as nice and daily reading publication. Why, because this book is more than just a book.

Helen Mota:

Spent a free a chance to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their very own friends. Usually they doing activity like watching television, likely to beach, or picnic from the park. They actually doing same every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Can be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you will ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the publication untitled Parallel Computing for Data Science: With Examples in R, C++ and CUDA (Chapman & Hall/CRC The R Series) can be excellent book to read. May be it might be best activity to you.

Diane Lomas:

Do you have something that you want such as book? The e-book lovers usually prefer to select book like comic, quick story and the biggest the first is novel. Now, why not attempting Parallel Computing for Data Science: With Examples in R, C++ and CUDA (Chapman & Hall/CRC The R Series) that give your entertainment preference will be satisfied through reading this book. Reading addiction all over the world can be said as the means for people to know world far better then how they react when it comes to the world. It can't be stated constantly that reading routine only for the geeky person but for all of you who wants to be success person. So , for all of you who want to start reading as your good habit, you are able to pick Parallel Computing for Data Science: With Examples in R, C++ and CUDA (Chapman & Hall/CRC The R Series) become your own starter.

Ethel Swafford:

Your reading 6th sense will not betray anyone, why because this Parallel Computing for Data Science: With Examples in R, C++ and CUDA (Chapman & Hall/CRC The R Series) e-book written by well-known writer who knows well how to make book that can be understand by anyone who also read the book. Written within good manner for you, still dripping wet every ideas and composing skill only for eliminate your own personal hunger then you still question Parallel Computing for Data Science: With Examples in R, C++ and

CUDA (Chapman & Hall/CRC The R Series) as good book not merely by the cover but also with the content. This is one reserve that can break don't assess book by its protect, so do you still needing an additional sixth sense to pick that!? Oh come on your examining sixth sense already said so why you have to listening to yet another sixth sense.
