Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing)

Wail A. Mousa, Abdullatif A. Al-Shuhail

Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing)

Wail A. Mousa, Abdullatif A. Al-Shuhail

Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing) Wail A. Mousa, Abdullatif A. Al-Shuhail

This short book is for students, professors and professionals interested in signal processing of seismic data using MATLAB™. The step-by-step demo of the full reflection seismic data processing workflow using a complete real seismic data set places itself as a very useful feature of the book. This is especially true when students are performing their projects, and when professors and researchers are testing their new developed algorithms in MATLAB™ for processing seismic data. The book provides the basic seismic and signal processing theory required for each chapter and shows how to process the data from raw field records to a final image of the subsurface all using MATLAB™.

Table of Contents: Seismic Data Processing: A Quick Overview / Examination of A Real Seismic Data Set / Quality Control of Real Seismic Data / Seismic Noise Attenuation / Seismic Deconvolution / Carrying the Processing Forward / Static Corrections / Seismic Migration / Concluding Remarks

From reader reviews:

Marisa Reber:

Here thing why this specific Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing) are different and dependable to be yours. First of all looking at a book is good nevertheless it depends in the content than it which is the content is as yummy as food or not. Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing) giving you information deeper and different ways, you can find any reserve out there but there is no book that similar with Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing). It gives you thrill reading journey, its open up your eyes about the thing that will happened in the world which is possibly can be happened around you. It is easy to bring everywhere like in park, café, or even in your technique home by train. For anyone who is having difficulties in bringing the published book maybe the form of Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing) in e-book can be your substitute.

Dawn Dustin:

This Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing) are generally reliable for you who want to be a successful person, why. The explanation of this Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing) can be on the list of great books you must have is usually giving you more than just simple examining food but feed an individual with information that possibly will shock your earlier knowledge. This book will be handy, you can bring it all over the place and whenever your conditions at e-book and printed versions. Beside that this Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing) forcing you to have an enormous of experience for instance rich vocabulary, giving you test of critical thinking that we know it useful in your day task. So , let's have it and luxuriate in reading.

Nicholas Tapia:

You may spend your free time to study this book this e-book. This Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing) is simple to develop you can read it in the recreation area, in the beach, train in addition to soon. If you did not possess much space to bring the actual printed book, you can buy the e-book. It is make you better to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.

Rachel Morris:

Is it you who having spare time in that case spend it whole day through watching television programs or just lying on the bed? Do you need something totally new? This Processing of Seismic Reflection Data Using MATLAB (Synthesis Lectures on Signal Processing) can be the respond to, oh how comes? It's a book you know. You are so out of date, spending your extra time by reading in this new era is common not a nerd

activity. So what these books have than the others?
