Combustion, Fourth Edition

Irvin Glassman, Richard A. Yetter

Combustion, Fourth Edition Irvin Glassman, Richard A. Yetter

Combustion Engineering, a topic generally taught at the upper undergraduate and graduate level in most mechanical engineering programs, and many chemical engineering programs, is the study of rapid energy and mass transfer usually through the common physical phenomena of flame oxidation. It covers the physics and chemistry of this process and the engineering applications—from the generation of power such as the internal combustion automobile engine to the gas turbine engine. Renewed concerns about energy efficiency and fuel costs, along with continued concerns over toxic and particulate emissions have kept the interest in this vital area of engineering high and brought about new developments in both fundamental knowledge of flame and combustion physics as well as new technologies for flame and fuel control.

*New chapter on new combustion concepts and technologies, including discussion on nanotechnology as related to combustion, as well as microgravity combustion, microcombustion, and catalytic combustion—all interrelated and discussed by considering scaling issues (e.g., length and time scales).

*New information on sensitivity analysis of reaction mechanisms and generation and application of reduced mechanisms

*Expanded coverage of turbulent reactive flows to better illustrate real-world applications

*Important new sections on stabilization of diffusion flames. For the first time, the concept of triple flames will be introduced and discussed in the context of diffusion flame stabilization

From reader reviews:

Lonnie Fazio:

What do you concerning book? It is not important along with you? Or just adding material when you require something to explain what the one you have problem? How about your spare time? Or are you busy particular person? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have time? What did you do? All people has many questions above. The doctor has to answer that question mainly because just their can do that will. It said that about book. Book is familiar in each person. Yes, it is appropriate. Because start from on jardín de infancia until university need this Combustion, Fourth Edition to read.

Robert Carroll:

Hey guys, do you desires to finds a new book you just read? May be the book with the headline Combustion, Fourth Edition suitable to you? Typically the book was written by well known writer in this era. Often the book untitled Combustion, Fourth Edition is the main of several books that everyone read now. This particular book was inspired many men and women in the world. When you read this publication you will enter the new dimensions that you ever know just before. The author explained their thought in the simple way, therefore all of people can easily to recognise the core of this e-book. This book will give you a great deal of information about this world now. To help you see the represented of the world within this book.

Linda Matthews:

Spent a free time and energy to be fun activity to complete! A lot of people spent their free time with their family, or all their friends. Usually they carrying out activity like watching television, gonna beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? Can be reading a book might be option to fill your free of charge time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to attempt look for book, may be the book untitled Combustion, Fourth Edition can be very good book to read. May be it is usually best activity to you.

Roy Matsumoto:

You may get this Combustion, Fourth Edition by browse the bookstore or Mall. Just viewing or reviewing it can to be your solve challenge if you get difficulties for ones knowledge. Kinds of this publication are various. Not only by written or printed but also can you enjoy this book by e-book. In the modern era such as now, you just looking because of your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose correct ways for you.
