## **Semiconductor Power Electronics (Van Nostrand Reinhold Electrical/Computer Science and Engineering Series) Richard G. Hoft**

Semiconductors have been used widely in signal-level or "brain" applications. Since their invention in 1948, transistors have revolutionized the electronics industry in computers, information processing, and communications. Now, however, semiconductors are being used more and more where considerable "brawn" is required. Devices such as high-power bipolar junction transistors and power field-effect transistors, as well as SCRs, TRIACs, GTOs, and other semiconductor switching devices that use a p-n-p-n regenerative effect to achieve bistable action, are expanding the power-handling horizons of semiconductors and finding increasing application in a wide range of products including regulated power supplies, lamp dimmers, motor drives, pulse modulators, and heat controls. HVDC and electric-vehicle propulsion are two additional areas of application which may have a very significant long range impact on the technology. The impact of solid-state devices capable of handling appreciable power levels has yet to be fully realized. Since it first became available in late 1957, the SCR or silicon-controlled rectifier (also called the reverse blocking triode thyristor) has become the most popular member of the thyristor family. At present, SCRs are available from a large number of manufacturers in this country and abroad. SCR ratings range from less than one ampere to over three thousand amperes with voltage ratings in excess of three thousand volts.

### **From reader reviews:**

#### **Steven Clayton:**

Have you spare time to get a day? What do you do when you have more or little spare time? Yep, you can choose the suitable activity for spend your time. Any person spent their very own spare time to take a walk, shopping, or went to the particular Mall. How about open as well as read a book entitled Semiconductor Power Electronics (Van Nostrand Reinhold Electrical/Computer Science and Engineering Series)? Maybe it is being best activity for you. You know beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with the opinion or you have different opinion?

#### **Ronald Johnson:**

The book Semiconductor Power Electronics (Van Nostrand Reinhold Electrical/Computer Science and Engineering Series) can give more knowledge and information about everything you want. Exactly why must we leave the good thing like a book Semiconductor Power Electronics (Van Nostrand Reinhold Electrical/Computer Science and Engineering Series)? A few of you have a different opinion about publication. But one aim this book can give many details for us. It is absolutely right. Right now, try to closer along with your book. Knowledge or details that you take for that, you could give for each other; you could share all of these. Book Semiconductor Power Electronics (Van Nostrand Reinhold Electrical/Computer Science and Engineering Series) has simple shape however, you know: it has great and massive function for you. You can seem the enormous world by wide open and read a e-book. So it is very wonderful.

#### **James Hopwood:**

Semiconductor Power Electronics (Van Nostrand Reinhold Electrical/Computer Science and Engineering Series) can be one of your nice books that are good idea. Many of us recommend that straight away because this reserve has good vocabulary which could increase your knowledge in words, easy to understand, bit entertaining but nevertheless delivering the information. The author giving his/her effort that will put every word into joy arrangement in writing Semiconductor Power Electronics (Van Nostrand Reinhold Electrical/Computer Science and Engineering Series) yet doesn't forget the main position, giving the reader the hottest and based confirm resource facts that maybe you can be certainly one of it. This great information could drawn you into new stage of crucial pondering.

#### **Jeffrey Blough:**

You can obtain this Semiconductor Power Electronics (Van Nostrand Reinhold Electrical/Computer Science and Engineering Series) by go to the bookstore or Mall. Just simply viewing or reviewing it could possibly to be your solve issue if you get difficulties to your knowledge. Kinds of this e-book are various. Not only by written or printed but can you enjoy this book by means of e-book. In the modern era like now, you just looking from your mobile phone and searching what your problem. Right now, choose your own personal

ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still upgrade. Let's try to choose right ways for you.
