Sustainable ICTs and Management Systems for Green Computing Wen-Chen Hu

One way to reduce the greenhouse gas from IT is green computing, which is the practice of designing, manufacturing, using, and disposing of computers, servers, and associated subsystems for reducing the use of hazardous materials, maximizing energy efficiency, and promoting the recyclability or biodegradability of products.

Sustainable ICTs and Management Systems for Green Computing focuses on information technology using sustainable green computing to reduce energy and resources used. While there are a wide variety of green computing topics, this book is a collection of IT articles using green computing techniques that will provide timely, important technologies and methods of green computing to IT workers, students, and researchers alike.
